ABOUT ME

Software Engineering senior passionate about building scalable web applications and learning across the fullstack ecosystem. Experienced with backend development using Spring Boot and frontend/mobile development using ReactJS and React Native. Interested in modern web technologies, AI integration, and product-oriented engineering. Eager to contribute, learn quickly, and adapt in fast-paced startup environments.

EDUCATION

FPT University

Software Engineering

9/2022 - NOW

SKILL

Core Skills

Docker

Express

Flutter

Github

Java

JavaScript

Kafka

Microservices architecture

Microsoft SQL Server

PostgreSql

React Native

ReactJS

Redis

Spring Boot

Soft Skills

- Communication
- Teamwork

WORK EXPERIENCE

INTERN DEV 07/2025 - 01/2026

Cong TY CP Dau Tu Cong Nghe Hoang Huy

Participated in developing the Hospital Canteen Management System, including authentication, authorization, and user/department management features, while also improving the UI of the Doffice UDS JSC mobile HR management application.

PROJECT:
D-office Mobile Application

- **iOS:** <https://apps.apple.com/vn/app/doffice-udsjsc/id6748683782?l=vi>
- **Android:** <https://play.google.com/store/apps/details?id=udsjsc.doffice>
- ❖ **Description:** Mobile HR management application supporting attendance, leave requests, task management, and employee information management.
- ❖ **Responsibilities:**
 - Developed and redesigned mobile UI based on Figma designs using React Native.
 - Implemented screens for attendance, leave requests, tasks, and employee

Hospital Canteen Management System

- ❖ **Description:** Canteen management system for hospitals that uses QR code scanning to manage free daily meal distribution for employees and patients.
- ❖ **Responsibilities:**
 - Developed QR code scanning and ticket printing workflow.
 - Built frontend interfaces for meal management and scan history tracking.

HIGHLIGHT PROJECT

Hương Vân Trà 05/2026 - NOW

- ❖ **Description:**

A Microservices-based Tea Chain Management and POS Sales System (Huong Van Tra) that supports real-time synchronization of order processing, Bill of Materials (BOM) management, inventory control, and revenue reporting across multiple branches.
- ❖ **Responsibilities:**
 - Developed the Product Management module.
 - Built the Bill of Materials (BOM) management module and automated production order workflows that deduct raw material inventory from the corresponding shelf locations at each branch.
 - Developed the POS web application for sales and inventory management.
- ❖ **Technologies:**

Spring Boot, Spring Cloud (Gateway, Discovery), Spring Security, Keycloak, OAuth2, Spring Data JPA, Hibernate, MySQL, Flyway, Kafka (Avro), Redis, ReactJS, TypeScript, Tailwind CSS

FOREIGN LANGUAGE

English : Intermediate

Personalized Japanese Learning System (FU OHAYO)05/2025 - 09/2025

❖ GitHub:

• Frontend: <https://github.com/annguyen-1707/Personalized-Learning-System-Fontend>

• Backend: <https://github.com/annguyen-1707/Personalized-Learning-System>

❖ Description: Web-based Japanese learning platform supporting personalized learning paths with integrating AI to practice speaking and vocabulary

❖ Responsibilities:

• Developed security and authentication features using Spring Security and JWT.

• Implemented speaking practice and pronunciation scoring using Azure Speech Service.

• Integrated Spring AI and Gemini AI to generate exercises and quiz questions based on vocabulary, grammar lists.

❖ Technologies: Spring Boot, MySQL, ReactJS, Azure Speech Service, Gemini AI, VNPay
